DETAILED ACTION

Claim Objections

1. Claims 1 and 39 are objected to because of the following informalities:
2. Claim 1, line 13 recites: "acquires." Examiner suggests the term be re-written as "acquired."
3. Claim 39, line 2, recites: "the movable member." Examiner notes there is no antecedent basis for the use of this term.
4. The claims have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the claims.
5. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

7. Claim 39 is rejected under 35 U.S.C. 102(a) as being anticipated by Noegel et al. (U.S. Patent 6,575,624).

Figure 1 – Radiation Device – U.S. Patent 6,575,624 to Noegel et al.

9. As per claim 39, Noegel et al. disclose a radiation apparatus comprising: a radiation generating unit (10); a guide (8) that moves the radiation generating unit along an orbit (a) with a predetermined radius about an isocenter such that the emitted radiation crosses at a point; a support member (7) that rotates the guide about a turning axis extended through the isocenter and arranged in parallel with a plane defined by the orbit; and a microwave source (31) which supplies microwaves to the radiation generating unit via a waveguide (30').

Allowable Subject Matter

10. Claims 1, 3-16, 18, 20-24, 39 and 40 are allowed.

11. The following is a statement of reasons for the indication of allowable subject matter:

12. As per claim 1 and dependent claims 3-16, 18, 20-24 and 40, the examiner found no reference in the prior art that disclosed or made obvious a radiation treatment apparatus comprising a control unit that controls two axes of a movable member that rotatably supports a radiation generating unit, to change a radiation direction of the radiation generating unit on the

basis of information acquired by the imager, as recited in independent claim 1 and further supported by applicants remarks p. 12-13, received 01/04/06.

Conclusion

13. Examiner note: new claim 39 was added in response to the Non-Final Office Action mailed 7/13/05.

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
